Minimum sanding thickness 2mm

Guaranteed Tolerance +/- 0.2mm

Contact us for more information on this service.

### **Laser machine at Emkay Plastics Ltd**

#### **Emkay expansion plans, "Phase Six" is on its way...**

Emkay will be offering a new service in the coming months! A Laser cutting machine is currently making its way to the Emkay factory! After many queries about and requests for Laser cutting over the years, Emkay will be offering laser cutting of both ROHACELL® and Acrylic.

ROHACELL® laser cutting into; tiles, strips or complex 2D shapes.

Acrylic laser cutting and engraving.

Laser cutting is a manufacturing process which can eliminate the need for machining on many engineering jobs, enabling you to save money on manufacturing costs.

The precision levels and edge quality achieved with laser cutting machines are better than traditional cutting methods, as the laser beam will not wear during the laser cutting process. Laser cutting technology also enables us to cut complex shapes without the need for tooling and at a similar or faster speed than other cutting methods.

#### **Laser machine capabilities**

**Maximum width 900mm**

**Maximum length 1600mm**

**Maximum depth 30mm**
